

Earth

The planet we live on we call it our home,
When all people are born they are free to
roam.

Through mountains hills rivers and lakes,
We need to protect them whatever it takes.

It's full of oceans trees and grass,
And it used to be free of pollution and gas.

All of a sudden we started producing,
All of the stuff we should be reducing.

Help the world by using a bin,
Recycle paper cardboard or tin.

Don't throw your plastic in the sea,
Don't you know there's no Planet B.

By Abby Marren, 5th class

Lisacul National School, Castlereah.
